COUNTY BOROUGH OF HUDDERSFIELD.

MEDICAL INSPECTION OF SCHOOL CHILDREN.

ANNUAL REPORT FOR 1919.

SCHOOL ACCOMMODATION AND ATTENDANCE.

Children on School Registers—16,146, with an average attendance of 13,444. This is 186 children, and 311 attendances less than 1918.

Number of Places—21,699.

The staff now consists of the following :—

Chief School Medical Officer	...	S. G. H. Moore.	M.D., D.P.H., M.O.H.
Assistant School Medical	do.	M. I. McNulty,	M.B., Ch.B., B.A.O.
School Dentist	...	...	H. P. Shoesmith, L.D.S.
School Nurse	...	...	Miss B. Tomlinson.
Do.	...	...	Miss N. Dixon.
Do.	..	...	Mrs. M. L. Dickson.
Do.	...	...	Miss M. Slaven.
Clerk	...	...	Miss F. Maplestone.

GENERAL REVIEW OF THE HYGIENIC CONDITIONS
PREVALENT IN THE SCHOOLS.

There is no outstanding change to report. The general standard of cleanliness of schools and scholars is relatively high, but may not be regarded as satisfactory. Scabies has been more prevalent than before the war.

There is still no co-ordination between the Medical Department and those responsible for the structural condition of the Schools.

CORRELATION OF THE SCHOOL MEDICAL SERVICE
WITH THE PUBLIC HEALTH SERVICE.

Unchanged from last year.

DISTURBANCE OF SCHOOL ARRANGEMENTS.

No complaints have been received. The need to avoid interference with the scholars' study, so far as the major requirements of the public health permitted, was steadily kept in mind. See page (8) "Influence of Infectious Diseases on Schools."

Objections on the part of the parents to Medical Inspection were received in 11 cases, comparing with 6 in 1918.

Parents' interest in Medical Inspection has increased. During 1918, 1169 children were accompanied; in 1919, 1343. This is 174 more than last year's figure and 233 less than the figure of 1917.

THE EXTENT AND SCOPE OF MEDICAL INSPECTION.

The arrangements remain as in the previous year. Children notified for inspection 3887, absentees at first examination 424, of whom 194 were examined later.

Total routine examinations 3463.

Group.	Boys.	Girls.	Total.
Entrants 	621	615	1,236
Intermediates (8 years) ...	597	565	1,162
Leavers 	527	538	1,065
	—	—	—
Totals 	1,745	1,718	3,463

In addition to the foregoing, 137 special medical inspections were made of children presented by the teachers.

Among these 170 defects were found, and measures were taken for their amelioration.

Final totals—3,794. Last year, 1918, this figure was 3,297.

The average time occupied per child, per inspection, was 5.59 minutes, as against 5.19 in the previous year.

The outstanding features compared with last year's report, are as follows :—

There has been an increase in the number of pupils examined with an increase in the number of defects found.

There has been a marked increase in the cases of Cardiac Disease discovered, both functional and organic.

The usual mode of procedure for keeping each case under observation, as well by means of written communication to the

parents, as by means of visits to the schools and homes of the children, is still in operation. The number of such visits paid during 1919 reaches a total of 4,430. Each defective child is followed up until the case is determined.

REVIEW OF CONDITIONS FOUND ON MEDICAL INSPECTION.

CLEANLINESS.—A Cleansing Station is not yet established.

The School Nurses made inspections for pediculosis of 3,051 children, of whom were verminous 102, equal to a percentage of 3.34, as compared with 9.37 per cent. in 1918. This number is exclusive of cases coming under notice otherwise (vide Table VI. post).

Pediculosis fails to receive the attention which its importance calls for. Education is interfered with by inattention in school as a result of discomfort, and the ill-health which the condition causes. Adenitis and blood-poisoning are the most common form of definite disease observed. But even more important is the effect on character. How can a child establish the foundation of self-respect who is the subject of the shame and sense of degradation which belong—and properly belong—to this condition.

SECONDARY SCHOOL (GIRLS).

No. inspected showing defects found.

HEIGHT—WEIGHT CO-EFFICIENT.

HEIGHT AND WEIGHT.—The height and weight co-efficients for the children examined during the year are given in the following table. A further table shows the gain in height and weight made by children previously examined at the age of five years who have been inspected during the year under review, at the ages of eight and twelve years respectively.

Age.			BOYS, No. examined	$\frac{W}{H}$	GIRLS, No. examined	$\frac{W}{H}$
5 years	..	..	621	15.39	615	14.82
8 years	..	..	597	17.56	565	17.13
12 years	..	..	527	21.08	538	20.93

The 1918 figures were :—

5 years	...	...	531	14.87	564	14.68
8 „	...	...	479	17.19	455	16.58
12 „	...	...	451	20.53	405	19.79

* Weight in ounces divided by height in inches, thus :—

$$\frac{\text{Weight}}{\text{Height}} = \text{height-weight co-efficient.}$$

AVERAGE GAIN IN HEIGHT AND WEIGHT.

		Between 5 and 8 years of age.			Between 8 and 12 years of age.

REVIEW OF THE METHODS EMPLOYED OR AVAILABLE FOR THE TREATMENT OF DEFECTS.

As previous years.

Spectacles provided during the year	...	...	45 pairs.
„ „ at Committee's Expense	...	7	„
„ „ at Parent's Expense	...	38	„

The Cinderella Society and the Guild of Help have, as in former years, looked after those cases referred to them, which were deserving of their attention.

During the year 528 children have been entertained in the summer to a week's holiday in the country, the children usually going in batches of thirty.

Other children to the number of 1,090 were taken for a day's outing at the expense of Pearson's Fresh Air Fund.

Footgear and clothing have also been supplied to all those children found to be in need of same.

Much of the credit for the small number of badly clothed and ill-shod children found in the schools must undoubtedly be given to those Societies. The manner in which they look after the welfare of the children should gain for them active support.

INFLUENCE OF INFECTIOUS DISEASE ON SCHOOLS.

The following schools were closed during the periods mentioned owing to the prevalence of Influenza and Measles.

Paddock C.E., Girls	...Influenza	Jan. 23rd to Feb. 7th, 1919
St. Patrick's R.C.	... „	„ „
Stile Common Cl., Infants	„	Jan. 29th to Feb. 14th, 1919
St. Joseph's R.C.	... „	Jan. 30th to Feb. 14th, 1919
Mount Pleasant Cl., Infants	„	Jan. 31st to Feb. 14th, 1919
Deighton Cl. Mixed & Infants.	„	Feb. 6th to Feb. 21st, 1919
Outlane Cl., Infants	...Measles	Nov. 5th to Nov. 28th, 1919
Stile Common Cl., Infants	„	Nov. 18th to Nov. 28th, 1919
Woodhouse C.E., Infants	... „	Nov. 14th to Dec. 12th, 1919

INFLUENZA.

All the Schools in the Borough were closed from February 22nd to March 21st, 1919, owing to the prevalence of Influenza Epidemic. They were disinfected.

The fatality from Influenza at school ages in Huddersfield was very low.

OTHER INFECTIOUS DISEASES.

The incidence of other common infectious diseases among school children was light during 1919.

DENTAL CLINIC.

Equipment and Outfit.—The same as last year with the addition of a second dental chair and a new foot engine.

Ages of children examined—6 to 8 years.

INSPECTIONS.—The following schools were inspected :—
Almondbury Provided, Almondbury Lowerhouses Non-Provided, Birkby Provided, Crosland Moor Provided, Crosland Moor Non-Provided, Hillhouse Non-Provided, Lockwood Non-Provided, Longroyd Bridge Non-Provided, Longwood Non-Provided, Mold-green Non-Provided, Oakes Provided, Paddock Provided, Paddock Non-Provided, Rashcliffe Non-Provided, St. Andrew's Non-Provided, St. Joseph's R.C., St. Paul's Non-Provided, Stile Common Provided, Trinity Marsh Non-Provided, and Trinity Provided.

No. of children examined, 1,496.

Total defects, 8,447. Permanent teeth, 742.

Temporary teeth, 7,705.

Percentage of children with defective teeth 94.59, comparing with 91.07 during 1918.

Children presenting themselves spontaneously at the Clinic :—

No. of children, 1,183. The figures for 1918 were 967.

Total defects, 4,355. Permanent teeth, 904.

Temporary teeth, 3,451.

Treatment :—

Total number treated	...	...	1894
Total attendances...	...	...	2779

Extractions :—

Temporary teeth	...	...	4301
Permanent teeth	...	...	205
General anæsthesia	...	...	27
Local anæsthesia	...	...	1744

Conservative Work :—

Fillings	...	...	1582
Dressings	...	...	410
Scalings	...	...	110
Various treatments	...	...	3

General anæsthesia is invariably administered by a qualified and registered medical practitioner.

REPORT ON THE PHYSICAL TRAINING IN THE HUDDERSFIELD ELEMENTARY SCHOOLS.

Since my appointment in January, 1919, as Organiser of Physical Training to the Huddersfield Education Committee, I have visited all the departments of the 40 Schools in the County Borough of Huddersfield.

With regard to my inspection of the teaching of Physical Exercises, I find that a good number of the teachers, especially the younger ones, show considerable interest in this subject, and are obtaining good results with their classes. Three teachers, in particular, who have attended Summer Schools for Physical Training, are doing exceedingly good work in their respective Schools. Two of these teachers obtained grants from the Board of Education this year to attend the Scarborough Summer School.

There are some very weak teachers, chiefly those whose age and physical disabilities prevent their taking an active part in the lesson, and also some untrained teachers who have never attended courses in Physical Training. In some such cases I am advising that this subject be given over to some of the younger teachers who are better qualified to teach it. Eight departments have adopted this scheme and it is working satisfactorily.

During August of this year, I was on the staff of the Scarborough Summer School, and taught according to the new Syllabus of Physical Exercises. Hence I have been able to give demonstration lessons on that work with some of the of the classes in the Huddersfield Schools. Until the new Syllabus is published I am urging teachers to break up their tables and introduce short games and other forms of general activity, as well as to end their lessons with games.

In four Upper Departments of Mixed Schools, where the older boys and girls were taken together for Physical Exercises, it has now been made possible, with the return of the men teachers from the Services, to separate the girls and boys for this subject.

In the matter of organised games, five more Upper Departments this year are making use of public recreation grounds or fields, bringing the total up to 15. Seven more Upper Departments,

with suitable playgrounds, have started organised games, bringing the total up to nine. Two schools are about to have a field acquired for their use.

The boys play cricket, football, and playground games, and have one period a week during school time allotted for games. In addition to this, some of the men teachers devote part of their Saturday mornings to coaching the boys in games, and Inter-School Matches are then frequently played on a football ground lent by a Local Athletic Club. The girls play net-ball, rounders, captain-ball, and playground games, to which one period a week is given. During the summer Inter-School net-ball matches were played between teams of girls from three schools. Boys at the Woodwork Centres make the net-ball rings and posts as required.

Physical Training in the Infants' Departments consists of simple exercises with opportunities for free movement and free play, games and dances of a simple nature, and singing games.

An increasing number of girls are wearing rubber shoes and tunics, and at one school 80% of the girls wear this form of dress. In a few cases the tunics are made at school in the needlework lesson. The shoes are obtainable at a local firm of boot makers who have ordered a large stock of "plimsoll" shoes.

During the summer months I visited the two Central Swimming Baths where children from 25 schools receive instruction from qualified teachers, one man and two women. Land drill forms a very important part of the teaching. For water practice the pupils are arranged in pairs, each in turn assisting the other under the direction of the instructor.

The following grants have been made by the Local Education Committee during the year towards the Physical Training :—

£25 for cricket requisities for boys' schools.

8 footballs for net-ball.

£6 to two teachers for Scarborough Summer School fees.

With regard to the Teachers' Classes, two were conducted last winter, for the first part by Miss Swanwick, the late Organiser, and for the latter part by myself. The Upper School Teachers'

Class continued, in spite of frequent epidemics of influenza, to the end of the summer, the last four classes being devoted to net-ball. The Infant Teachers' Class was discontinued at Easter, owing to a marked decrease in attendance in consequence of influenza. After Easter, a short course was held for teachers of Infants and of Standard I. with the object of correlating the work of the two departments. This class was attended by 31 teachers, and, in addition, 10 came as onlookers.

This winter I am holding two classes ; one for teachers of Infants' Schools and of Standard I., and the other an Advanced Course for teachers who have either attended a previous course or who have recently left College.

At the Advanced Class, which has 24 members on the register, the work of the new Syllabus is taken. Simple country dances and dancing steps are taught, and the teachers also make up simple dances of their own, and teach them to the rest of the class. Games, simple ones and the bigger organised games, such as net-ball and Potted Sports are taken. Special attention is given to commanding and practice in teaching exercises, games and dancing, one teacher taking the whole class, or several teachers teaching groups. Towards the end of the course they will be called upon to take classes of children. The last four classes will be devoted to organised games, some of which, although learnt in the hall at our disposal, will be better played in a playground during the lighter evenings. The theory consists of revision and explanations of the new Syllabus.

The Infant Teachers' Class, which has 19 members on the register, is conducted on similar lines to the above. Work, both practical and theoretical, on the Infant Supplement of the new Syllabus is taken, and also simple dances, games, and practice in teaching.

M. W. RANDALL.
